

Hercules Valve Boxes

HERCULES is the new Irritrol's valve boxes range, a whole brand created to join together maximum protection of underground systems (valves and related instruments), and handiness of use, with ease of installation and adjustment for existent or new irrigation systems.

Features

Resistance

Versatility

Range in line with the standard EN124, designed to support loads of up to 1.5 tons

Circular models:

Lid:

- Double-hole handle, with opening direction indicated
- Bayonet coupling system, with optional locking screw
- Circular border covering the body, rapid positioning and water/earth entrance prevention
- Anti-slip surface
- Grass green color

Body:

- Conical shape, for underground fastness
- Reinforced wall thickness against structural collapse
- Ready to use pipe inlet slots, easily enlargeable

Rectangular models:

Lid:

- Access handle for easy opening
- Perimetric border covering the body, rapid positioning and water/earth entrance prevention
- Optional locking screw
- Anti-slip surface
- Grass green color

Body:

- Oblique shape for underground fastness
- Innovative wall design for rapid and safe opening for tube entrances, without the necessity of electric power on site
- Reinforced angles against structural collapse

Codification
