

SUPERLINK 6 FOR WINDOWS

Software for central control

Highlights

- Extended table function
- Upgraded quick collection and storage of data
- Improved calendar function
- Running of advanced energy models
- Flexible graphical design
- User-friendly transfer of data to one or more departments
- Climate recipes for quick changes
- Flexible graphical presentation of historical data
- Windows-based

SuperLink 6 is an advanced PC program with a graphic user interface, and it provides an easy and reliable control of all climate controls and fertilizer mixers from Senmatic. The program offers many new facilities and options for collection of climate and fertilizer data.

Central control

SuperLink 6 makes it easy and fast to read and adjust the conditions in various departments, as all information can be shown in and controlled directly from a central computer in the company. SuperLink 6 guarantees the best possible utilization of our advanced equipment for controlling climate, irrigation and fertilization.
